CONNECTED TO L'ORÉAL PALM-BASED OLEODERIVATIVES SUPPLY-CHAIN IN 2017

L'Oréal is mainly sourcing derivatives based on palm oil and palm kernel oil, which are supplied by surfactants or oleochemicals manufacturers. These manufacturers are themselves sourcing directly or indirectly from traders, primary refineries, secondary refineries and crushing plants, which are connected to thousands of potential palm oil mills on the ground. Every year, L'Oréal – via consultations with direct and indirect suppliers realized by an independent third party – conducts an investigation of its supply chain in order to map out L'Oréal's sourcing areas. The list of potential mills presented here is one of the outcome of this in-depth work, and is representative of the singular complexity of the palm derivatives supply chain compared notably with directly palm oil or palm kernel oil sourcing. Such high level of transparency in L'Oréal's supply chain allows the Group to monitor the stakes more closely, prioritize its areas of action, and most of all engage with its direct and indirect suppliers towards ensuring compliance with L'Oréal's Zero Deforestation policy.
